Made with care in Australia. Oliver the owl and Mira the fox are from our gentle picture book *Oliver and the Lantern Path*.

Teaching Tips for Grown-ups

Core Skills Studio · Lantern Path Books

A few simple ways to help your child get the most from this workbook. Little and often works best, ten quiet minutes a day beats an hour once a week.

Skip counting is still the key

Little cheat: keep practising skip counting in every number, 2s, 3s, 4s, 5s, 6s, 7s, 8s, 9s. Each one your child can count is a times table they already know. This is the single biggest shortcut to fast multiplication.

Two tricks for the hard tables

You only really learn half the tables: 4×7 is the same as 7×4 .

For the 9 times table, the two digits of the answer always add up to 9 (18, 27, 36, 45...), and $9 \times$ a number is one less than $10 \times$ it ($9 \times 6 = 60 - 6 = 54$).

Division is tables backwards

$24 \div 6$ just asks "how many 6s make 24?". If they know $6 \times 4 = 24$, they already know $24 \div 6 = 4$.

Spelling tricky words

Break a hard word into chunks you can hear: 'be-cause', 'peo-ple', 'Wed-nes-day'.

Times Tables to 10
