Teaching Tips for Grown-ups

Core Skills Studio · Lantern Path Books

A few simple ways to help your child get the most from this workbook. Little and often works best, ten quiet minutes a day beats an hour once a week.

Aim for all the tables to 12

Little cheat: learn only the facts your child keeps missing, not the ones they already know. Skip counting still helps the hard ones: 7, 14, 21, 28... and 8, 16, 24, 32...

Doubles and the nine trick

The 2s are doubles ($2 \times 8 = \text{double } 8$). The 4s are double-doubles ($4 \times 8 = \text{double } 8, \text{ doubled}$). The 8s are double again.

For the 9s, the answer's digits still add up to 9, and $9 \times$ a number is one less than $10 \times$ it.

Division as a fact family

Every times-table fact gives three more. Practise them together: $7 \times 8 = 56$, so $56 \div 8 = 7$ and $56 \div 7 = 8$.

Tricky spelling

Long words are easier in chunks: 'fav-our-ite', 'sep-a-rate'. For 'business', say 'busy-ness' to remember the start.

Times Tables to 12
